The number of breeding cattle being exported to destinations such as Russia, Kazakhstan, Turkey and China under the ACGEA Standards and certification is increasing at a rapid rate. The following document provides a check list to ensure your animals are ACGEA Export ready and meet the protocols outlined in the ACGEA standards.

Note: There will a range of other requirements and specifications, outside of the ACGEA standards, for your animals to be eligible for export. These will be known by your stock agent and/or exporter contact.
